

Amazon WorkSpaces - Simple, Secure and Cost Effective

eLaw rolls out Remote Working without any major investment

About eLaw

Since 2000, thousands of legal professionals in New York and New Jersey have relied on eLaw to simplify and streamline their case management. This multi-award winning solution is packed with features such as a eWatch case tracking, eCopy document retrieval and an electronic document portal to enables lawyers and paralegals to productively manage their caseloads and stay on top of each case, all the time. eLaw has embraced many modern-day working practices like flexible working hours, telecommuting and BYOD. But these conveniences also bring challenges, as eLaw

The challenge

For eLaw, remote working and BYOD raised many security risks: unprotected devices, inadvertent data leaks, insecure applications & loss of managerial control. Plus, with more calls & support requests from remote workers, the costs of technical support were on the rise, To address security issues, improve their BYOD control & reduce their support costs, eLaw needed to implement 'uniform' device deployment – remotely, quickly & cheaply.

The solution

Amazon WorkSpaces provided an affordable, managed solution that enabled eLaw to uniformly provision all their BYOD systems. It also helped them set up an agile, remote technical support team to quickly resolve issues for their remote/BYOD workers. The solution included Amazon FSx for Windows File Server for fully managed, highly reliable file storage. It also integrated with AWS Managed Microsoft AD for easy access to AWS applications and services, as well as easier user/group management.

The benefits

Always up-to-date

With automatic updates, it protects from technology obsolescence.

Easy collaboration with FSx

With Amazon FSx shared folder, teams can collaborate easily and more effectively on their Workspaces.

Highly Secure

Workspaces are in isolated VPC, and work seamlessly with your Enterprise AD and MFA.

About Access.io & AWS

- ✓ Access.io, an AWS Advanced Partner, offers world-class Cloud Managed Services and DevOps Automation to organizations worldwide.
