

## Amazon WorkSpaces

A cost effective, managed cloud desktop for flexible work styles

### Easily & securely provision cloud-based desktops

Amazon WorkSpaces is a managed Desktop-as-a-Service (DaaS) solution. With Amazon WorkSpaces, you can deploy your corporate desktop environment on the AWS Cloud, providing your users secure, convenient access to the applications, documents, and resources they need, on the device of their choice from almost anywhere in the world. Amazon WorkSpaces integrates with your current IT resources, so you can derive all of the benefits of virtual desktops while continuing to use existing policies and practices. No upfront investment is required, scaling is simple and quick, and it is built on the trusted AWS Cloud. Amazon WorkSpaces is available in multiple AWS regions worldwide, so you can deploy in a single region, or globally, and scale at your own pace.

### Contact us for a test bed at no cost!

You can scale your global deployment of cloud desktop at scale in no time. You can rely on us for a cost-effective, secure and agile delivery of your cloud desktops. Our AWS Certified Solution Architect and Engineers can help you assess your need, and build a solution that scale with your growth.

Not convinced, contact us for a PoC at no cost.

### Use cases

Amazon WorkSpaces is ideal for any situation where desktop needs can change quickly.

High-Security Requirements

Mobile workers & remote employees

Temporary Workers

Employee-Owned Devices

Development and Test

### Integrate with your existing corporate infrastructure

Amazon WorkSpaces can be smoothly integrated with your on-premises environment and Microsoft Active Directory, allowing your users to continue using their corporate credentials, and your IT department to maintain existing policies and processes. When you launch a new Amazon WorkSpace, you can choose to encrypt its volumes using AWS Key Management Service (AWS KMS). AWS KMS makes it easy to create and control encryption keys & uses hardware security modules to protect the security of your keys. You can also bring your existing Windows 7 and Windows 10 Desktop licenses to Amazon WorkSpaces and run the Windows 7 and Windows 10 Desktop Operating System on hardware that is physically dedicated to you. If your organization uses multi-factor authentication, you can incorporate your existing multi-factor authentication (MFA) practice by connecting your RADIUS server with Amazon WorkSpaces for increased security.

## Why Amazon WorkSpaces?

### Secure

Your Windows desktop and business-critical data is hosted on the AWS Cloud, and never leaves a securely managed environment.

### Flexible and Scalable

Get started in minutes and grow your deployment from just a few users to tens of thousands with ease. Amazon WorkSpaces scales seamlessly with your needs and at your pace.

### Cost-Effective

Amazon WorkSpaces requires no upfront investments or long-term commitment. You pay only for what you use, make your IT expenses predictable, and lower your costs.

### Globally Available

Amazon WorkSpaces is available in multiple AWS regions. Global access allows you to add users in new regions simply & cost-effectively, and data remains in the region you assign it to for compliance with regulatory requirements.

### Fast, Familiar User Experience

Amazon WorkSpaces offers a fluid, highly interactive user experience that adjusts dynamically to network conditions. Your users can access familiar Windows desktops with full fidelity from iOS, Android, Mac, & Windows devices, thin and zero clients, and even select smartphones.

### Reliable

Amazon WorkSpaces is built on the highly reliable AWS Cloud that supports mission-critical workloads for many startups, enterprises, and government organizations.

### Easy to Deploy and Manage

Amazon WorkSpaces is a fully managed Desktop-as-a-Service solution. The intuitive Amazon WorkSpaces admin console allows you to connect to your on-premises Microsoft Active Directory, manage applications, and control user access.

### Consistent Performance

Amazon WorkSpaces runs on the massive compute infrastructure of AWS so it can offer consistent performance at any scale. Moreover, as the underlying infrastructure improves, you enjoy improved performance with predictable costs.

## About Access.io

Access.io is an Advanced Consulting Partner of Amazon Web Services (AWS) specializing in DevOps, Cloud Migration and Managed Services. With offices in USA and India, we have been helping companies to transform and optimize their IT infrastructure and helping them in managing their work loads from their Global Network Operations Center (GNOC).

The ISO 27001-2013 certified 24 X 7 GNOC monitors and manages the operations of both cloud and on-premise data centers from a single location to manage cost, security, reliability and performance of your applications.
